

Summer Week 4

6/21-6/25

Where did we go?

South America

- Brazil
- Venezuela
- Chile
- Argentina
- Peru

REMINDERS:

- ❖ Splash Day
Friday July 2nd

KG Prep

Weekly Review

This week in KG Prep we travelled to South America! We got to travel to Brazil to design our own masks for The Carnival in Rio de Janeiro. We then went to Venezuela to learn about the worlds tallest water fall and then created our very own using water paint, we went to Chile to see the Easter Island heads and then got to make our own using coffee and black sand. We ended our week with playing soccer in Argentina and finally we landed in Peru where we got to explore the Andes.

In STEM this week students got to work on designing and programming the Ozobot Robots. Students were given the experimental design task to make a course using markers that the Ozobot could follow. Students then were given stickers that allowed their robots to go in certain directions. Students had the opportunity to try their courses along with other student's courses to experiment with what track worked the best.
